

Do on-line psychological services start-ups have a big potential market in China

JING MENG

29299675

What is my story about?

- ▶ The data story is regarding the exploration of whether the on-line psychological services start-ups have a big potential market in China.
 - ▶ Claims - On-line psychological services start-ups have a big potential market in China
 - ▶ Backing - China's mental health resources are below the world average and unevenly distributed, which means China has big demand for psychological services but lacks mental health resources
 - ▶ Warrant - Mental health spending per capita increases with Gross National Income rising. With the improvement of China's Gross National Income, on-line psychological services start-ups will have a big potential market in China.

What are the questions I will answer?

- ▶ Do on-line psychological services start-ups have a big potential market in China?
 - ▶ Are China's mental health resources below the world average?
 - ▶ Are China's mental health resources unevenly distributed?
 - ▶ Does mental health spending per capita increase with Gross National Income rising?

What data am I using and how do I analyse it?

- ▶ 1. Beds in general hospitals for mental health and beds in mental hospitals (per 100 000 population) globally in 2014
http://www.who.int/gho/mental_health/care_delivery/beds_hospitals/en/
- ▶ 2. Outpatient facilities (per 100 000 population) globally in 2011
http://www.who.int/gho/mental_health/care_delivery/outpatient_facilities/en/
- ▶ 3. Psychiatrists and nurses (per 100 000 population) globally in 2014
http://www.who.int/gho/mental_health/human_resources/psychiatrists_nurses/en/
- ▶ 4. Ma et al. (2012). Allocation of mental health facilities and psychiatric beds in China in 2010. *Chinese Mental Health Journal*, 26(120), 885-889.
- ▶ 5. Zhu et al. (2002). Current status of mental health service personnel in China. *Shanghai Psychiatry*, (z1), 10-11.
- ▶ 6. L. I. U. et al. (2013). Number and characteristics of medical professionals working in Chinese mental health facilities. *Shanghai archives of psychiatry*, 25(5), 277.
- ▶ 7. Mental Health Atlas-2014 country profiles http://www.who.int/mental_health/evidence/atlas/profiles-2014/en/

From data sources 1,2,3 , compare China's mental health resources with other typical countries' and world average to analyse whether the resources are below the world average

From data source 4, show the distribution of mental health facilities and psychiatric beds in China to analyse whether the resources are unevenly distributed

From data sources 5,6, demonstrate the distribution of mental health human resources in China to analyse whether the resources are unevenly distributed

From data sources 7, Plot a scatter between the Mental Health spending per capita and Gross National Income to analyse the correlation between them

What are the (preliminary) conclusions?

- ▶ China's mental health resources are below the world average.
- ▶ China's mental health resources are unevenly distributed.
- ▶ Mental health spending per capita increases with Gross National Income rising.

Overall, with the improvement of China's Gross National Income, on-line psychological services start-ups have a big potential market in China.

What types of charts/interactions do I plan to use?

- ▶ Use bar chart to compare China's mental health resources with other typical countries' and world average to show China's mental health resources below the world average
 - ▶ Scales - per 100,000 population
- ▶ Use heat map to show the distribution of mental health facilities psychiatric beds and medical professionals in China to indicate China's mental health resources are unevenly distributed
 - ▶ Scales - per 10,000 population
- ▶ Plot a scatter between the Mental Health spending per capita and Gross National Income and make a fitting model, to demonstrate Mental health spending per capita increases with Gross National Income rising
 - ▶ Scales – US \$
